Question 4

1 / 1 pts

Given the following HTML code snippet:

```
<main>
  <section class="linklist">
    <h2>Products</h2>
    <ul>
      <li>Lamp Shade <a href="products/4567.html">Details</a></li>      <li>Electrical Plug Protectors <a href="products/4567.html">Details</a></li>
    </ul>
  </section>
</main>
```

Which of the following CSS selectors selects all the list item elements in the unordered list?

- ☒ .linklist ul li
- ☐ .linklist h2 ul li
- ☐ .linklist, ul, li
- ☐ main > li
- ☐ .linklist + li

Question 5

1 / 1 pts

Given the following JS code snippet with variables, rewrite the entire statement using a template literal.

Here is an example of the output desired: "There are 54 days until Christmas!"

You can assume that all the variables used in the concatenated expression have been declared and are ready to use. You must include a closing semicolon.

```
const daysUntil = "There are " + daycount + " days until " + targetEvent + "!";
```

```
const daysUntil = `There are ${daycount} days until ${targetEvent}!`;
```

Question 6

1 / 1 pts

Which of the following JavaScript variable declaration statements has a function scope versus a block scope? **We should avoid using this variable declaration keyword.**

- ☒ var

[MDN var statement](https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Statements/var) (https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Statements/var)

- ☐ let
- ☐ const
- ☐ def
