Website Project Subject

Overview

The purpose of this assignment is to help you decide upon a subject for your website project and to begin planning and designing your project. The outline of project deliverables is as follows:

- Week 4: Project Subject
- Week 5: Project Site Plan and Build
- Week 6: Project Build

The objective of the website project is to support the **course learning outcomes**:

- Develop dynamic websites that use valid HTML and CSS that follow best practices of accessibility and compliance.
- Create dynamic web sites that leverage browser APIs, JSON, and remote APIs.
- Use industry tools to monitor performance and to optimize the user experience.
- Demonstrate the traits of an effective team member (such as clear communication, collaboration, fulfilling assignments, and meeting deadlines).

Prepare

1. Review and consider the Project Description.

Instructions

At this point you are only proposing a topic or entity to be the subject of your website.

> ⚠️ Your individual website project subject **cannot** be about the chamber of commerce project.

1. Decide on the subject of your website. Consider a project on a topic, organization, business, and that is of personal interest to you enough to create a three page information site.

> **Example**: A site about an e-bike riding club. Briefly describe what kind of information and/or services will it provide?

Submission

Submit your website project topic, and describe, in general, the site content, and the reason you chose this subject in Canvas. The submission is a simple text entry.
